## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 17, 2008 has been entered.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 to 12, 20 to 23, and 25 to 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over European patent 0950723 for the reasons set forth in the previous office action dated June 19, 2007 , December 18, 2007, and June 5, 2008.

4. To distinguish claims over prior art, it is recommended that Applicant demonstrate (e.g. by comparative test data) that the soluble carbon concentration of 0.3 to 0.8 wt% recited by the claims would not be expected in prior art roller bearing steel.
